

**JDRF** IMPROVING  
LIVES.  
CURING  
TYPE 1  
DIABETES.

# May is Jelly Baby Month

**Help JDRF find a cure for type 1 diabetes  
by purchasing Jelly Baby  
merchandise and confectionery.**

Merchandise sales will fund vital medical research to help the 122,300 Australians living with type 1 diabetes.

Will is 6 years old and has had type 1 diabetes since he was 2.

Every single time he eats, Will's parents prick his finger to check his blood sugar, calculate the right dose of insulin to give him via his insulin pump, which is connected to his bloodstream all the time.

Will's mum says "Despite the burdens, Will is our little hero. He doesn't like having type 1 diabetes - but he doesn't let this disease stop him."
