

Wanted: Statistics People for Mountain Airs and Thunder Games

We are looking for people that are interested in learning how to take stats. There is a requirement for all men's and women's NBL games to have suitably trained and qualified stats people.

Stats are entered into a computer program and usually are live streamed on the internet.

There are two positions when taking stats, a caller and a data entry as follows:

Caller: This person calls the game as it happens, in a consistent, logical manner for the data entry person to input

Data Entry: This person enters the actions that the caller narrates into the computer program, prints off box scores for each team after every quarter and sends the final stats to BBNZ office.

If you are interested please contact:
