

## Referees Guidelines - Lead Official

1. Get down the court as quickly as possible and allow the play to come to you.
  2. You are responsible for the baseline and sideline to your left.
  3. Be ready to assist your partner with 3-point attempts, particularly when taken in area.
  4. Always establish eye contact with your partner.
  5. Pay particular attention to post play. Any rough play is your responsibility. Recognise when a player is illegally prevented from moving into a new position.
  6. Try to be 2 metres back from the baseline to get the best possible angle. A wider angle means better vision. Penetrate to the basket when the ball is dribbled from rectangle 4 to 5 to 6. See the start and end of the drive.
  7. Avoid penalising incidental contact that does not affect the play.
- " Go where you need to go in order to see what you need to see"**
