8. Risk Management

We recognise the importance of a risk management approach to minimising the potential for child abuse or harm to occur and use this to inform our policy, procedures and activity planning. In addition to general occupational health and safety risks, we manage risks of

abuse to our children. To reduce the risk of child abuse occurring, adults to whom this policy applies should avoid direct, unsupervised contact with children. For example, this should be a consideration in the following situations:

- when using change room facilities;
- when using accommodation or overnight stays;
- travel to/from club sanctioned events; or
- physical contact when coaching or managing children.

9. Social Media Use

Club members will follow the guidelines set in place by current Club policies, as well as recommendations from governing bodies, regarding the use of social media for communication with children within the Club. This will include:

- 9.1. Communication regarding junior teams will include the parents/legal guardians of children.
- 9.2. No adult in a role working with children in the Club should engage in individual social friendships with children from the Club on personal social media sites without the knowledge of parents/legal guardians.
- 9.3. Multiple adults, including Club President and/or Division Manager, will be part of the contact list and included in any social media communication with children from, or on behalf of the Club, or regarding Club details.
- 9.4. When setting up a social media platform connected with any club or individual team within the club, an administrator should be appointed as someone who will check on the status of posts and comments.
- 9.5. Confidentiality is important, permission must be obtained from parents for any use of a child's name or photo to be used in any postings, this is particularly important in case of any custody issues or privacy required.
